

# How Can Paper Contribute to Society?

The spread of abandoned bamboo forests is becoming a major environmental issue in Japan. To help solve this problem, it is important to create a larger consumption of bamboo.

Chuetsu Pulp & Paper is the only company manufacturing *Takegami* paper in Japan, which is made from 100% domestic bamboo.

Utilizing bamboo in Japan will protect the Satoyama forests or woodlands, especially ones nearby residential areas, and conserve biodiversity as well as revitalize the local economy.

Through the core business of paper making, Chuetsu Pulp & Paper helps to solve challenging social problems.

**Chuetsu Pulp & Paper Co., Ltd.**
