## **Relevant questions as reference to speakers:**

- 1) What are the types of issues that we should pay attention to if we are to increase resilience in landscapes and seascapes?**
- 2) How do multiple communities in shared landscapes or seascapes organize themselves around common issues and strengthen local institutions to act together to rehabilitate or maintain sustainable use of biodiversity resources and ecosystem services?**
- 3) What triggered cooperation among communities to agree on common goals in facilitating sustainable livelihood activities in shared landscapes and seascapes?**
- 4) Can we identify any specific social institutions, mechanisms or factors that have strengthened the resilience of your landscapes and seascapes?**
- 5) What enhances communications between communities and policy makers to ensure effective upscaling? How can communities be empowered to be engaged in outscaling?**
