

CBD COP-13 Side Event 2087:

Contributions of funding mechanisms under the Satoyama Initiative to mainstreaming biodiversity for well-being

8 December 2016

18:15-19:45

IGO's Group Meeting Room,
Sunrise Building 2F

Refreshments will be provided

Mainstreaming biodiversity at the landscape level requires integration and coordination from local to regional and global levels. Funding provided to local projects should be aligned with policy priorities to maximize its on-the-ground effectiveness and contribute to the base of knowledge useful at larger scales. Several models of funding mechanisms have been established through collaborative activities under the International Partnership for the Satoyama Initiative (IPSI), from seed funding for promising local projects to combining GEF financing for site-based activities with the production and management of knowledge at a global scale. This side event will provide insight on how funding mechanisms can effectively contribute toward mainstreaming biodiversity through supporting actions for sustainable management of production landscapes and seascapes.

CBD COP-13 Side Event 2087: Contributions of funding mechanisms under the Satoyama Initiative to mainstreaming biodiversity for well-being

Programme

Introduction:

Mr. Naoya Tsukamoto

(United Nations University Institute for the Advanced Study of Sustainability)

The latest GEF analysis on mainstreaming portfolio in relation to SEPLS:

Ms. Yoko Watanabe (Global Environmental Facility)

IPSI Collaborative Activity 1: GEF-Satoyama Project

Dr. Yoji Natori (Conservation International)

IPSI Collaborative Activity 2: Community Development and Knowledge Management for the Satoyama Initiative (COMDEKS) Project

Mr. William Dunbar

(United Nations University Institute for the Advanced Study of Sustainability)

IPSI Collaborative Activity 3:

Satoyama Development Mechanism (SDM) Project

Mr. Yohsuke Amano

(United Nations University Institute for the Advanced Study of Sustainability)

Panel discussion:

Moderator : Prof. Alfred Oteng-Yeboah

(University of Ghana, Ghana National Biodiversity Committee)

Panelist: Ms. Yoko Watanabe (GEF)

Dr. Miguel A. Morales (CI)

Mr. William Dunbar (UNU-IAS)

Mr. Yohsuke Amano (UNU-IAS)
