

Introduction of IPSI, Socio-Ecological Production Landscapes and Seascapes (SEPLS), Strategy, and Action Plan

Wataru Suzuki
Secretariat of the International Partnership for the Satoyama Initiative (IPSI)
United Nations University Institute of Advanced Studies (UNU-IAS)
4th December 2013, Suva, Fiji

What is the Satoyama Initiative?

*The Satoyama Initiative aims to conserve **Socio-Ecological Production Landscapes and Seascapes (SEPLS)** for realizing a society in harmony with nature*

**SATOYAMA
INITIATIVE**

What does SEPLS stand for?

What does SEPLS stand for?

(Socio-Ecological Production Landscapes and Seascapes; SEPLS)

***Landscapes and seascapes that are
dynamic mosaics of managed socio-
ecological systems producing a
bundle of ecosystem services for
human well-being***

Socio-Ecological Production Landscapes and Seascapes

Source: The Japan Satoyama Satoumi Assessment (JSSA)

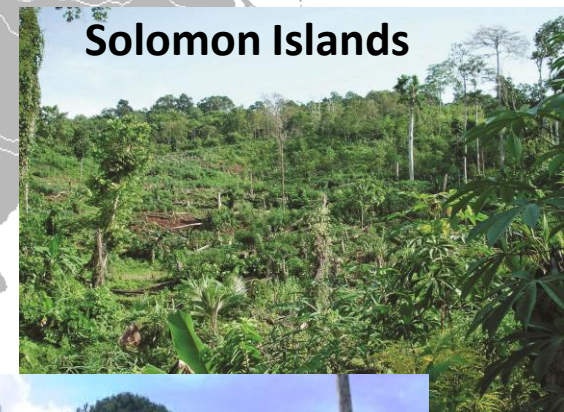

Examples of SEPLS

Agricultural land, secondary woodlands, rice paddies, grasslands, coastal fishing fields, aquaculture sites, etc.

- *Landscapes and seascapes formed through long-term interaction between humans and nature*
- *Natural resources used in a cyclical manner within the carrying capacity and resilience of the ecosystem*

SEPLS are found around the world

Benefits from management of SEPLS

- *Achievement of both conservation of biodiversity and securing of human well-being*
- *Maintenance and enhanced resilience of communities through practical application*

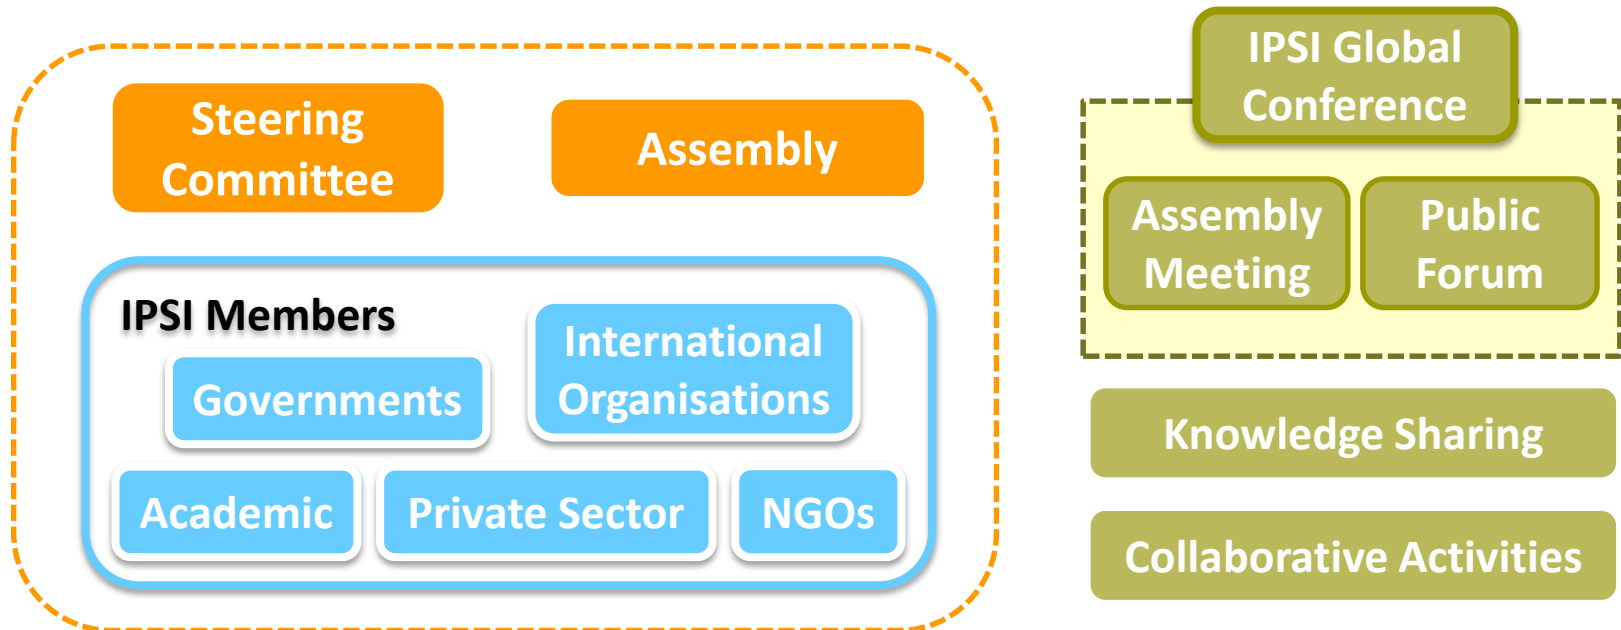

The International Partnership for the Satoyama Initiative (IPSI)

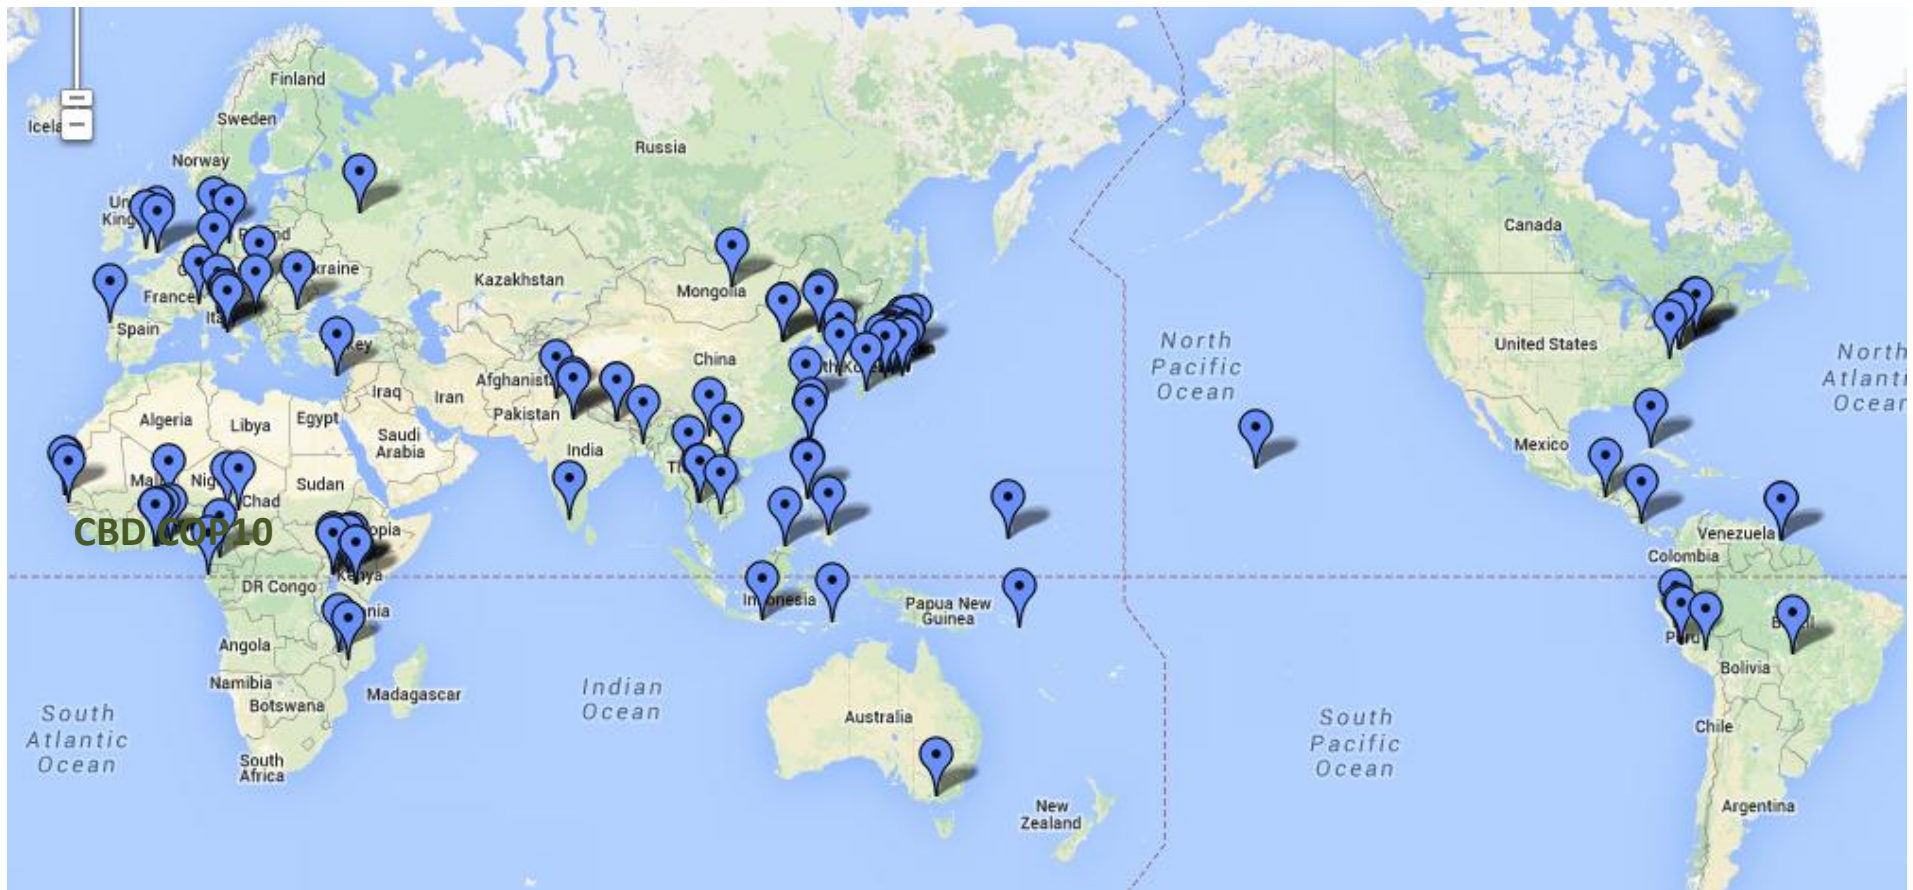

The International Partnership for the Satoyama Initiative (IPSI)

- A platform for various activities (conferences/workshops, project implementation, information sharing, etc.)
- Securing synergies, maximizing resources, and mutual strengthening of respective activities

Organisational Structure of IPSI

IPSI members around the world

CBD COP10

51 members (Oct, 2010)

Launch of IPSI (CBD COP10)

155 members (Sep, 2013)

4th Global Conference of IPSI (IPSI-4)

Conceptual framework of IPSI activities

Enhancing understanding and raising awareness of the importance of SEPLS

Policy Research

Knowledge Facilitation

Indicators Research

IPSI Activity Category

Capacity Building

On the Ground

Promoting maintenance and rebuilding of SEPLS

IPSI Strategy

Realising the vision of the Satoyama Initiative

*Vision of the
Satoyama
Initiative*

***Vision of the Satoyama Initiative
“Realising Societies
in Harmony with Nature”***

Strategy

- IPSI Strategy***
 - Mission*
 - Objectives*

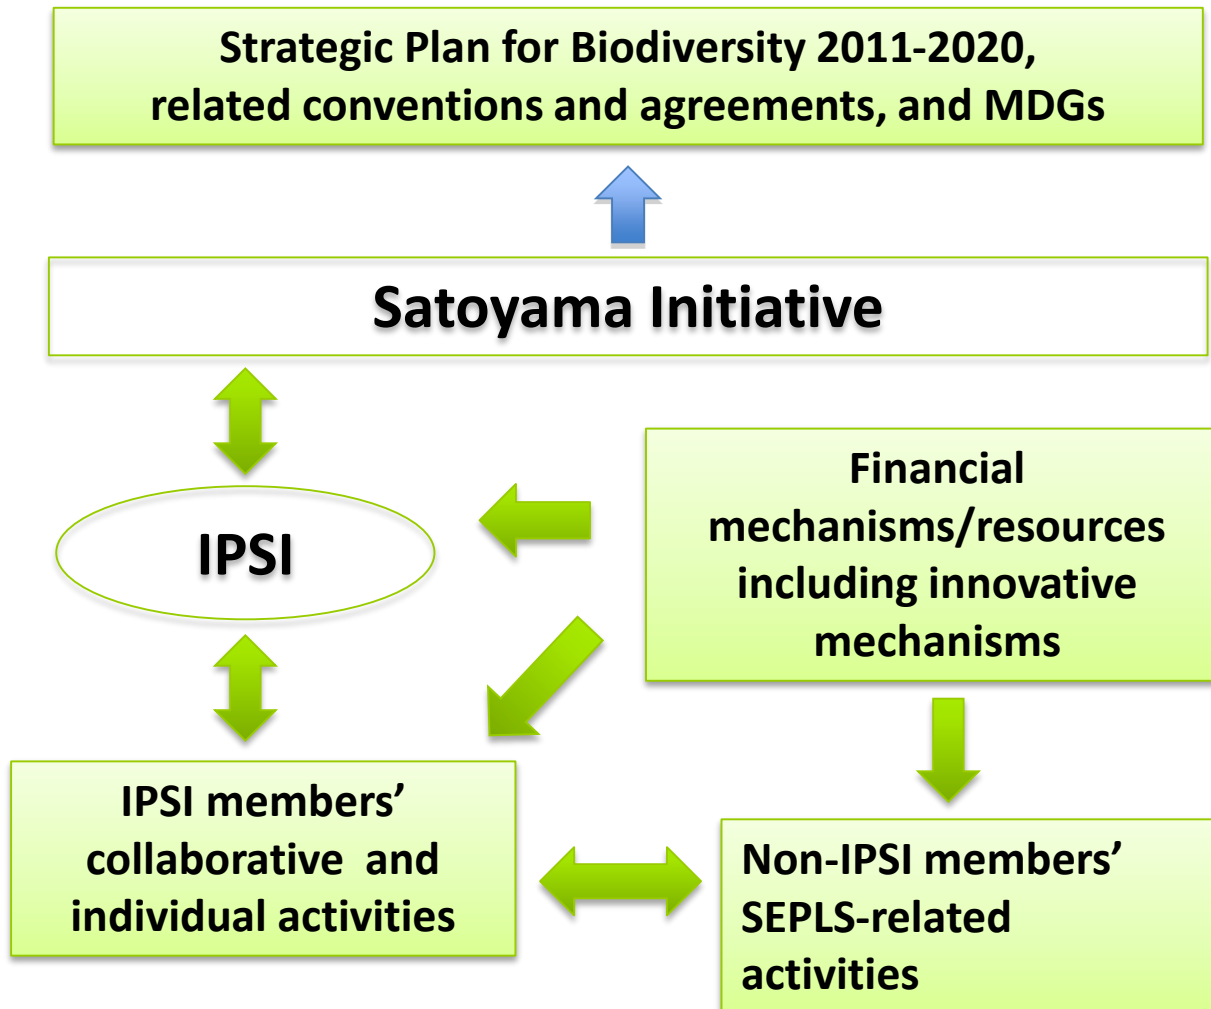

**Plan of
Action**

- IPSI Plan of Action***
 - Priority Actions*
 - Mechanisms to Implement
Priority Actions*
 - Monitoring, Reporting and
Evaluation*

Overview of the IPSI Strategy

Overview / IPSI's strategic contribution

IPSI Plan of Action

IPSI Plan of Action

A. Background

I: Introduction to the Initiative and IPSI

II: Planning Process

B. Priority Actions

Identified priority actions based on the strategic objectives described in the Strategy

C. Mechanisms to implement priority actions

I. Building the Partnership

II. Promoting Collaborative Activities

III. Collaboration with Relevant International Agreements, Initiatives, Programmes and Network

D. Monitoring, Reporting and Evaluation

A: Background

I: The Satoyama Initiative and International Partnership for the Satoyama Initiative (*brief introduction to the Initiative and IPSI*)

II: Strategic Planning Process

- ❑ Overview of steps towards developing Plan of Action
- ❑ Plan of Action envisioned for five-year timeframe
- ❑ Dynamic document subject to adjustment/revision as appropriate
- ❑ Actions specifically linked to objectives in IPSI Strategy, Aichi Biodiversity Targets, and other relevant targets like MDGs

B: Priority Actions based on IPSI Strategy

Structure: 22 Priority Actions divided into four sections, one for each of the objectives described in the IPSI Strategy

I

- **Strategic Objective I: Increasing Knowledge and Understanding**
- **Current context within IPSI**
- **List of Priority Actions**

II

- **Strategic Objective II: Addressing the Direct and Underlying Causes of Loss and Degradation**
- **Current context within IPSI**
- **List of Priority Actions**

III

- **Strategic Objective III: Enhancing Benefits**
- **Current context within IPSI**
- **List of Priority Actions**

IV

- **Strategic Objective IV: Enhancing Capacities**
- **Current context within IPSI**
- **List of Priority Actions**

C: Mechanisms to implement Priority Actions

Structure: As a partnership, several mechanisms are available to IPSI to support the implementation of priority actions. A partial list of three of these mechanisms is included in the Plan of Action.

I

- **Building the Partnership**
- Current situation
- Planned actions

II

- **Promoting Collaborative Activities**
- Current situation
- Planned actions

III

- **Collaboration with related agreements, initiatives, programs and networks**
- Current situation
- Planned actions

D: Monitoring, reporting, and evaluation

- ❑ **A five-year timeframe** is envisioned
- ❑ **Interim review** to be conducted around the third year; second review at the end of the five-year period
- ❑ The Secretariat will develop a simple **reporting mechanism** for member organizations
- ❑ The Secretariat will compile and publish **annual reports** to describe the Partnership's progress towards achieving the four strategic objectives

SATOYAMA
INITIATIVE

Further Actions

Further Action

- A. To *implement the IPSI Strategy and the Plan of Action* on the ground
- B. To make IPSI a truly *global network* and to further encourage active participation from under-represented regions
- C. To further develop Collaborative Activities, in particular relating to *seascapes and coastal zones*
- D. To enhance research activities, particularly those related to *case study analysis, resilience, and new business models*

Thank you very much!
