

Revitalizing nested governance approaches
to ensure equity in implementing socio-
ecological policies

- **Virtual Round Table**
- **ACUNS 2025**
- **23 June 2025**

“Landscape Approaches”, leveraging multiple governance arrangements and diverse socio-ecological priorities

- **Presented by**
- **Suneetha M Subramanian, UNU-IAS and IPSI Secretariat**
- **ACUNS 2025**
- **June 23, 2025**

Landscape Approaches and SEPLS

- **Socio-ecological system** (social and ecological components operate as a functional unit)
- Utilitarian spaces
- Interconnected mosaic of ecosystems with different governance regimes (from Ridge to Reef)
- Multifunctional
- Multiple actors, multiple priorities, multiple uses
- Diverse demographies
- Diverse governance regimes and management systems
- Different choices – different consequences and Trade offs
- *Seek to live well using the landscape and seascapes and resources within, using knowledge, expertise and necessary resources (technical, human, natural and financial) from within and outside the sites*

Understanding

Capacity Development

Instill sense of
ownership

Communicate to what
motivates action

- **Focusing on**

- On connectivity between actors and ecosystems, actions and consequences
- On direct and underlying drivers, Trade-offs on choices made
- Keeping the focus on outcomes (socio-ecological resilience, wellbeing, anticipatory adaptive management across economic priorities, social-ecological equity and relations and environmental integrity)
- Developing tools customizable to contexts
- Securing resources appropriate to scale and context
